Material Safety Data Sheet

MEDICAL OXYGEN, COMPRESSED (O2)

Not classified as hazardous

1. IDENTIFICATION OF THE SUBSTANCE/PREPARATION AND COMPANY/UNDERTAKING

Product Name: MEDICAL OXYGEN, COMPRESSED (O2)
Product Use: Medical Applications in Respiratory Therapy, Anaesthesia, Hyperbaric and high altitude breathing.
Company Name: Air Liquide Healthcare Pty Limited (ABN 41002 653045)
Address: Unit 5, 476 Gardeners Road Alexandria NSW 2015
Emergency Tel.: (AH) 1800 812 588
Telephone: Tel: (02) 9364 7474
Fax: (02) 8338 9797
Other Names: Not Available

2. COMPOSITION/INFORMATION ON INGREDIENTS

3. HAZARDS IDENTIFICATION

Chronic Effects
No health effects have been observed in humans when exposed to concentrations up to 80% volume for several hours or up to 50% volume for 24 hours. Hyperoxia may occur after 2 to 6 hours when exposed at pressures above 1 atmosphere. Exposure at normal or elevated pressure may cause severe thickening and scarring of lung tissues. Not carcinogenic or mutagenic.
### Inhalation
Gas is non-toxic. Breathing high concentrations of oxygen may cause symptoms of hyperoxia including cramps, nausea, dizziness, hypothermia, ambylopa (loss of vision), respiratory difficulties, bradycardia, fainting spells and convulsions capable of leading to death.

### Ingestion
Not applicable to gases.

### Skin
Under certain circumstances, may cause redness, itching and irritation.

### Eye
Under certain circumstances, may cause eye irritation, tearing, stinging, blurred vision, and redness.

#### 4. FIRST AID MEASURES

<table>
<thead>
<tr>
<th>Inhalation</th>
<th>If inhaled, remove from contaminated area. Apply Expired Air resuscitation if not breathing. If symptoms develop seek medical attention.</th>

<tr>
<td>Flammability</td>
<td>Non-flammable product but vigorously supports combustion of materials which will not usually burn in air. Concentrations of 25 volume %</td>
</tr>
</tbody>
</table>
Oxygen will significantly increase the rate of combustion for some materials. Fires may start easily due to the reduced temperatures required to ignite materials in oxygen enriched atmospheres.

6. ACCIDENTAL RELEASE MEASURES

Restrict access to area until completion of clean-up. Ensure clean-up is conducted by trained personnel only. Wear adequate personal protective equipment. Ventilate area.

CLEAN-UP: Prevent material from entering confined spaces. Stop or reduce leak if safe to do so. Allow gas to dissipate into the atmosphere. Use self-contained breathing apparatus (SCBA) for large spills or releases. Never attempt to repair a damaged or leaking cylinder valve. Leak checking may be done by pressure drop test or by using oxygen compatible leak detecting solution on joints and outlets. Mark empty cylinders 'defective'. Return all faulty cylinders to Air Liquide Healthcare. Dispose of according to federal, Environmental Protection Authority and state regulations. If large quantities of this material enter the environment contact the Environmental Protection Authority, or your local Waste Management Authority.

7. HANDLING AND STORAGE

**Handling**

DO NOT use near welding operations, flames, or hot surfaces such as furnaces or heaters. Move cylinders by hand-truck or cart designed for that purpose. DO NOT lift cylinders by their caps. DO NOT handle them with oily hands. Secure cylinders in place in an upright position at all times. DO NOT drop cylinders or permit them to bang against each other. Leave valve cap on cylinder until cylinder is secured and ready for use. Check for leaks after pressurising system and prior to starting any operating. Only experienced and properly trained people should use this product. Open valve slowly.

**Storage**

Cylinders shall be stored in a cool, dry, well ventilated area out of direct sunlight and away from heat and ignition sources. Store away from emergency exits and heavy traffic areas. Outside or detached storage is preferred. No part of cylinders shall be exposed to temperatures above 55°C. Cylinders shall be stored upright on a level, fireproof floor, secure in position and protected from damage. Full cylinders shall be stored separately from empties. Keep cylinder valve cover on. Label empty cylinders and store full cylinders separately from empty ones. Comply with all applicable regulations for the storage and handling of compressed gases.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

**National Exposure Standards**

No exposure standards have been established for this material by the National Occupational Health And Safety Commission (NOHSC).

**Respiratory Protection**

Not applicable.

**Eye Protection**

Safety glasses with side shields, goggles or full-face shield as appropriate recommended. Final choice of appropriate eye/face protection will vary according to individual circumstances i.e. methods of handling or engineering controls and according to risk assessments undertaken. Eye protection should conform with Australian/New Zealand Standard AS/NZS 1337 – Eye Protectors for Industrial Applications.
Hand Protection  
Wear gloves of impervious material such as leather when moving and connecting cylinders. Final choice of appropriate gloves will vary according to individual circumstances i.e. methods of handling or according to risk assessments undertaken. Reference should be made to AS/NZS 2161.1: Occupational protective gloves - Selection, use and maintenance.

Body Protection  
Wear appropriate clothing including chemical resistant apron where clothing is likely to be contaminated. It is advisable that a local supplier of personal protective clothing is consulted regarding the choice of material.

Eng. Controls  
Use with good general ventilation. If gases are produced local exhaust ventilation should be used.

Biological Limit Values  
No biological limit allocated.

9. PHYSICAL AND CHEMICAL PROPERTIES

**Appearance**  
Colourless, tasteless gas.

**Odour**  
Odourless.

**Melting Point**  
Not available.

**Boiling Point**  
-183°C @ 101.32 kPa

**Solubility in Water**  
0.0489 m3/kg @ 0°C

**Specific Gravity (H2O=1)**  
Not available.

**Vapour Pressure**  
(kPa at 25°C): No liquid phase

**Vapour Density (Air=1)**  
1.105 @ 0°C, 101.3 kPa, (Air = 1)

**Flash Point**  
Non flammable

**Flammability**  
Non-flammable product but vigorously supports combustion of materials which will not usually burn in air. Concentrations of 25 volume % oxygen will significantly increase the rate of combustion for some materials. Fires may start easily due to the reduced temperatures required to ignite materials in oxygen enriched atmospheres.

**Flammable Limits**

- **LEL**  
  Non flammable

- **UEL**  
  Non flammable

**Molecular Weight**  
32.00

**Other Information**  
Critical temperature: -118.6°C.  
Density of gas (101.3 Kpa, 15°C): 1.35 kg/m3  
Relative Density (@15°C), (Air=1): 1.105

10. STABILITY AND REACTIVITY

**Stability**  
Stable under normal conditions of storage and handling.
11. TOXICOLOGICAL INFORMATION

**Toxicology Information**
No toxicity data available for this product.

**Inhalation**
Gas is non-toxic. Breathing high concentrations of oxygen may cause symptoms of hyperoxia including cramps, nausea, dizziness, hypothermia, amblyopia (loss of vision), respiratory difficulties, bradycardia, fainting spells and convulsions capable of leading to death.

**Ingestion**
Not applicable to gases.

**Skin**
Under certain circumstances, may cause redness, itching and irritation.

**Eye**
Under certain circumstances, may cause eye irritation, tearing, stinging, blurred vision, and redness.

**Chronic Effects**
No health effects have been observed in humans when exposed to concentrations up to 80% volume for several hours or up to 50% volume for 24 hours. Hyperoxia may occur after 2 to 6 hours when exposed at pressures above 1 atmosphere. Exposure at normal or elevated pressure may cause severe thickening and scarring of lung tissues. Not carcinogenic or mutagenic.

12. ECOLOGICAL INFORMATION

**Environment Protection**
Prevent this material entering waterways, drains and sewers.

**Mobility**
Not available.

**Persistence / Degradability**
Not available.

**Ecotoxicity**
No ecological data available for this product.

13. DISPOSAL CONSIDERATIONS

Dispose of waste according to federal, EPA and state regulations.

14. TRANSPORT INFORMATION

This material is classified as a Class 2.2 (Non-flammable Non-toxic Gas) Dangerous Good according to the Australian Code for the Transport
of Dangerous Goods by Road and Rail. Dangerous goods of Class 2.2 (Non-flammable Non-toxic Gas) are incompatible in a placard load with any of the following:
- Class 1, Explosive
- Class 4.2, Spontaneously Combustible Substance
- Class 5.2, Organic Peroxide
