SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

| Trade name | Carbon dioxide (refrigerated) |
| SDS no | AL057 |
| Chemical description | Carbon dioxide (refrigerated) |
| CAS-No. | 124-38-9 |
| EC-No. | 204-696-9 |
| EC Index-No. | --- |
| REACH registration No | Listed in Annex IV / V REACH, exempted from registration. |
| Chemical formula | CO2 |

1.2. Relevant identified uses of the substance or mixture and uses advised against

Relevant identified uses
- Extinguishing agent
- Industrial and professional uses. Perform risk assessment prior to use.
- Test gas/Calibration gas.
- Shield gas for welding processes.
- Use for manufacture of electronic/photovoltaic components.
- Purge gas, diluting gas, inerting gas.
- Food applications.
- Use as a biocide.

Uses advised against
- Consumer use.
- Uses other than those listed above are not supported, contact your supplier for more information on other uses.

1.3. Details of the supplier of the safety data sheet

| Company identification | Air Liquide Australia Limited |
| Level 12 / 600 St. Kilda Road |
| 3004    Melbourne VIC    Australia |
| +61 3 9697 9888 |
| ALAEnquiries@AirLiquide.com |

1.4. Emergency telephone number

| Emergency telephone number | 1800 812 588 |

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

Classification according to WHS Regulation

| Physical hazards | Gases under pressure: Refrigerated liquefied gas | H281 |

2.2. Label elements

Classification according to WHS Regulation
Hazard pictograms : 

Signal word : Warning
Hazard statements : H281 - Contains refrigerated gas; may cause cryogenic burns or injury..
Precautionary statements

- Prevention : P282 - Wear cold insulating gloves and either face shield or eye protection..
- Response : P336+P315 - Thaw frosted parts with lukewarm water. Do not rub affected area. Get immediate medical advice/attention.
- Storage : P403 - Store in a well-ventilated place.

2.3. Other hazards

Asphyxiant in high concentrations. In high concentrations CO2 causes rapid circulatory insufficiency even at normal levels of oxygen concentration. Symptoms are headache, nausea and vomiting, which may lead to unconsciousness and death. The substance/mixture has no endocrine disrupting properties.

SECTION 3: Composition/information on ingredients

3.1. Substances :

Full text of H- and EUH-statements: see section 16
Contains no other components or impurities which will influence the classification of the product.
*1: Listed in Annex IV / V REACH, exempted from registration.
*2: Registration deadline not expired.
*3: Registration not required: Substance manufactured or imported < 1t/y.

SECTION 4: First aid measures

4.1. Description of first aid measures

- Inhalation : Remove victim to uncontaminated area wearing self contained breathing apparatus. Keep victim warm and rested. Call a doctor. Perform cardiopulmonary resuscitation if breathing stopped.
- Skin contact : In case of frostbite spray with water for at least 15 minutes. Apply a sterile dressing. Obtain medical assistance.
- Eye contact : Immediately flush eyes thoroughly with water for at least 15 minutes.
- Ingestion : Ingestion is not considered a potential route of exposure.

4.2. Most important symptoms and effects, both acute and delayed

In high concentrations may cause asphyxiation. Symptoms may include loss of mobility/consciousness. Victim may not be aware of asphyxiation. Low concentrations of CO2 cause increased respiration and headache. See section 11.

4.3. Indication of any immediate medical attention and special treatment needed

None.
SECTION 5: Firefighting measures

5.1 Extinguishing media

- Suitable extinguishing media
  : Water spray or fog. Product does not burn, use fire control measures appropriate for the surrounding fire.

- Unsuitable extinguishing media
  : Do not use water jet to extinguish.

5.2 Special hazards arising from the substance or mixture

Specific hazards
  : Exposure to fire may cause containers to rupture/explose.

Hazardous combustion products
  : None.

5.3 Advice for fire-fighters

Specific methods
  : Use fire control measures appropriate for the surrounding fire. Exposure to fire and heat radiation may cause gas receptacles to rupture. Cool endangered receptacles with water spray jet from a protected position. Prevent water used in emergency cases from entering sewers and drainage systems. If possible, stop flow of product. Use water spray or fog to knock down fire fumes if possible. Move containers away from the fire area if this can be done without risk.

Special protective equipment for fire fighters
  : In confined space use self-contained breathing apparatus.
  : Standard protective clothing and equipment (Self Contained Breathing Apparatus) for fire fighters.
  : Standard EN 137 - Self-contained open-circuit compressed air breathing apparatus with full face mask.

Hazchem Code
  : 2T

SECTION 6: Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures

No additional information available

6.2 Environmental precautions

  : Try to stop release. Liquid spillages can cause embrittlement of structural materials.

6.3 Methods and material for containment and cleaning up

  : Ventilate area.

6.4 Reference to other sections

  : See also sections 8 and 13.

SECTION 7: Handling and storage

7.1 Precautions for safe handling
CARBON DIOXIDE, Refrigerated Liquid (CO2)

Reference number: AL057

Safe use of the product:
- The product must be handled in accordance with good industrial hygiene and safety procedures.
- Only experienced and properly instructed persons should handle gases under pressure.
- Consider pressure relief device(s) in gas installations.
- Ensure the complete gas system was (or is regularly) checked for leaks before use.
- Do not smoke while handling product.
- Use only properly specified equipment which is suitable for this product, its supply pressure and temperature. Contact your gas supplier if in doubt.
- Avoid suck back of water, acid and alkalis.
- Do not breathe gas.
- Avoid release of product into atmosphere.
- Containers, which contain or have contained flammable or explosive substances, must not be inerted with liquid carbon dioxide. Potential production of solid CO2 particles must be ruled out.
- In order to rule out potential electrostatic discharge production, the system must be adequately grounded.
- Be aware of the risk of formation of static electricity with the use of CO2 extinguishers. Do not use them in places where a flammable atmosphere may be present.

Safe handling of the gas receptacle:
- Protect containers from physical damage; do not drag, roll, slide or drop.
- Refer to supplier's container handling instructions.
- Do not allow backfeed into the container.
- When moving cylinders, even for short distances, use a cart (trolley, hand truck, etc.) designed to transport cylinders.
- Leave valve protection caps in place until the container has been secured against either a wall or bench or placed in a container stand and is ready for use.
- If user experiences any difficulty operating valve discontinue use and contact supplier.
- Never attempt to repair or modify container valves or safety relief devices.
- Damaged valves should be reported immediately to the supplier.
- Keep container valve outlets clean and free from contaminants particular oil and water.
- Replace valve outlet caps or plugs and container caps where supplied as soon as container is disconnected from equipment.
- Close container valve after each use and when empty, even if still connected to equipment.
- Never attempt to transfer gases from one cylinder/container to another.
- Never use direct flame or electrical heating devices to raise the pressure of a container.
- Do not remove or deface labels provided by the supplier for the identification of the content of the container.
- Suck back of water into the container must be prevented.
- Open valve slowly to avoid pressure shock.

7.2. Conditions for safe storage, including any incompatibilities:
- For more guidance on the safe storage of refrigerated CO2, refer to EIGA Doc.66 ”Refrigerated CO2 storage at users’ premises”, downloadable at http://www.eiga.eu, and consult your supplier.
- Observe all regulations and local requirements regarding storage of containers.
- Containers should not be stored in conditions likely to encourage corrosion.
- Container valve guards or caps should be in place.
- Containers should be stored in the vertical position and properly secured to prevent them from falling over.
- Stored containers should be periodically checked for general condition and leakage.
- Keep container below 50°C in a well ventilated place.
- Store containers in location free from fire risk and away from sources of heat and ignition.
- Keep away from combustible materials.

7.3. Specific end use(s):
- None.

SECTION 8: Exposure controls/personal protection

8.1. Control parameters:
- OEL (Occupational Exposure Limits): No data available.
- DNEL (Derived-No Effect Level): No data available.
- PNEC (Predicted No-Effect Concentration): No data available.

8.2. Exposure controls:
8.2.1. Appropriate engineering controls

- Provide adequate general and local exhaust ventilation.
- Systems under pressure should be regularly checked for leakages.
- Ensure exposure is below occupational exposure limits (where available).
- Oxygen detectors should be used when asphyxiating gases may be released.
- Consider the use of a work permit system e.g. for maintenance activities.
- CO2 detectors should be used when CO2 may be released.

8.2.2. Individual protection measures, e.g. personal protective equipment

- A risk assessment should be conducted and documented in each work area to assess the risks related to the use of the product and to select the PPE that matches the relevant risk. The following recommendations should be considered:
- PPE compliant to the recommended EN/ISO standards should be selected.

- Eye/face protection: Wear goggles when transfilling or breaking transfer connections.
  Standard EN 166 - Personal eye-protection - specifications

- Skin protection
  - Hand protection: Wear working gloves when handling gas containers.
    Standard EN 388 - Protective gloves against mechanical risk.
  - Other: Wear safety shoes while handling containers.
    Standard EN ISO 20345 - Personal protective equipment - Safety footwear.

- Respiratory protection: Standard EN 137 - Self-contained open-circuit compressed air breathing apparatus with full face mask.
  Self contained breathing apparatus (SCBA) or positive pressure airline with mask are to be used in oxygen-deficient atmospheres.
  Self contained breathing apparatus is recommended, where unknown exposure may be expected, e.g. during maintenance activities on installation systems.

- Thermal hazards: None in addition to the above sections

8.2.3. Environmental exposure controls

- None necessary.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

**Appearance**
- Physical state at 20°C / 101.3kPa: Gas.
- Colour: Colourless.
- Odour: No odour warning properties.
- Odour threshold: Odour threshold is subjective and inadequate to warn of overexposure.
- pH value: Not applicable for gases and gas mixtures.
- Molar mass: 44 g/mol
- Melting point: -78.5 °C At atmospheric pressure dry ice sublimes into gaseous carbon dioxide.
- Boiling point: -56.6 °C
- Flash point: Not applicable for gases and gas mixtures.
- Evaporation rate (ether=1): No data available
- Flammability range: Non flammable.
- Vapour pressure [20°C]: 57.3 bar(a)
- Vapour pressure [50°C]: Not applicable.
- Relative density, gas (air=1): 1.52
- Relative density, liquid (water=1): 0.82
- Solubility in water: 2000 mg/l
- Partition coefficient n-octanol/water [log Kow]: 0.83
CARBON DIOXIDE, Refrigerated Liquid (CO2)

Auto-ignition temperature : Non flammable.
Decomposition point [°C] : Not applicable.
Viscosity [20°C] : No reliable data available.
Explosive Properties : No data available
Oxidising Properties : No oxidising properties

9.2. Other information
Other data : Gas/vapour heavier than air. May accumulate in confined spaces, particularly at or below ground level.

SECTION 10: Stability and reactivity

10.1. Reactivity
: No reactivity hazard other than the effects described in sub-sections below.

10.2. Chemical stability
: Stable under normal conditions.

10.3. Possibility of hazardous reactions
: None.

10.4. Conditions to avoid
: Avoid moisture in installation systems.

10.5. Incompatible materials
: For additional information on compatibility refer to ISO 11114. Materials such as carbon steel, low alloy carbon steel and plastic become brittle at low temperatures and are subject to failure. Use appropriate materials compatible with the cryogenic conditions present in refrigerated liquefied gas systems.

10.6. Hazardous decomposition products
: None.

SECTION 11: Toxicological information

11.1. Information on toxicological effects
Acute toxicity : Toxicological effects not expected from this product if occupational exposure limit values are not exceeded.
Skin corrosion/irritation : No known effects from this product.
Serious eye damage/irritation : No known effects from this product.
Respiratory or skin sensitisation : No known effects from this product.
Germ cell mutagenicity : No known effects from this product.
Carcinogenicity : No known effects from this product.
Toxic for reproduction : Fertility : No known effects from this product.
Toxic for reproduction : unborn child : No known effects from this product.
STOT-single exposure : No known effects from this product.
STOT-repeated exposure : No known effects from this product.
Aspiration hazard : Not applicable for gases and gas mixtures.
Other information : Unlike simple asphyxiants, carbon dioxide has the ability to cause death even when normal oxygen levels (20-21%) are maintained. 5% CO2 has been found to act synergistically to increase the toxicity of certain other gases (CO, NO2). CO2 has been shown to enhance the production of carboxy- or met-hemoglobin by these gases possibly due to carbon dioxide's stimulatory effects on the respiratory and circulatory systems. For more information, see 'EIGA Safety Info 24: Carbon Dioxide, Physiological Hazards' at www.eiga.eu. The substance/mixture has no endocrine disrupting properties.

SECTION 12: Ecological information

12.1. Toxicity
12.2. **Persistence and degradability**

Assessment: No ecological damage caused by this product.

12.3. **Bioaccumulative potential**

Assessment: No ecological damage caused by this product. Not expected to bioaccumulate due to the low log Kow (log Kow < 4). See section 9.

12.4. **Mobility in soil**

Assessment: No ecological damage caused by this product.

12.5. **Results of PBT and vPvB assessment**

Assessment: Not classified as PBT or vPvB.

12.6. **Other adverse effects**

- **Effect on the ozone layer**: No effect on the ozone layer.
- **Global warming potential [CO2=1]**: 1
- **Effect on global warming**: When discharged in large quantities may contribute to the greenhouse effect. Contains greenhouse gas(es).

### SECTION 13: Disposal considerations

- **Waste treatment methods**: May be vented to atmosphere in a well ventilated place. Do not discharge into any place where its accumulation could be dangerous. Return unused product in original container to supplier.

List of hazardous waste codes (from Commission Decision 2000/532/EC as amended):

- 16 05 05: Gases in pressure containers other than those mentioned in 16 05 04.

- **Additional information**: External treatment and disposal of waste should comply with applicable local and/or national regulations.

### SECTION 14: Transport information

- **UN number**: 2187

- **UN proper shipping name**: CARBON DIOXIDE, REFRIGERATED LIQUID

- **Transport by road/rail (ADR/RID)**: CARBON DIOXIDE, REFRIGERATED LIQUID

- **Transport by air (ICAO-TI / IATA-DGR)**: Carbon dioxide, refrigerated liquid

- **Transport by sea (IMDG)**: CARBON DIOXIDE, REFRIGERATED LIQUID

- **Transport hazard class(es)**

  - 2.2: Non-flammable, non-toxic gases
Transport by road/rail (ADG)
Class : 2
Hazchem Code : 2T
Hazard identification number : 22
Tunnel Restriction : C/E - Tank carriage : Passage forbidden through tunnels of category C, D and E. Other carriage : Passage forbidden through tunnels of category E

Transport by air (ICAO-TI / IATA-DGR)
Class / Div. (Sub. risk(s)) : 2.2

Transport by sea (IMDG)
Class / Div. (Sub. risk(s)) : 2.2
Emergency Schedule (EmS) - Fire : F-C
Emergency Schedule (EmS) - Spillage : S-V

14.4. Packing group
Transport by road/rail (ADR/RID) : Not applicable
Transport by air (ICAO-TI / IATA-DGR) : Not applicable
Transport by sea (IMDG) : Not applicable

14.5. Environmental hazards
Transport by road/rail (ADR/RID) : None.
Transport by air (ICAO-TI / IATA-DGR) : None.
Transport by sea (IMDG) : None.

14.6. Special precautions for user
No additional information available

Packing Instruction(s)
Transport by road/rail (ADR/RID) : P203
Transport by air (ICAO-TI / IATA-DGR)
  Passenger and Cargo Aircraft : 202
  Cargo Aircraft only : 202
Transport by sea (IMDG) : P203

Special transport precautions
Avoid transport on vehicles where the load space is not separated from the driver's compartment.
Ensure vehicle driver is aware of the potential hazards of the load and knows what to do in the event of an accident or an emergency.
Before transporting product containers:
  - Ensure there is adequate ventilation.
  - Ensure that containers are firmly secured.
  - Ensure valve is closed and not leaking.
  - Ensure valve outlet cap nut or plug (where provided) is correctly fitted.
  - Ensure valve protection device (where provided) is correctly fitted.

HAZCHEM CODE : 2T

14.7. Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code
Not applicable.

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture
National regulations
Ensure all national/local regulations are observed.

15.2. Chemical safety assessment

A CSA does not need to be carried out for this product.

SECTION 16: Other information

Indication of changes

Abbreviations and acronyms

Training advice
The hazard of asphyxiation is often overlooked and must be stressed during operator training. For more guidance, refer to EIGA SL 01 "Dangers of Asphyxiation", downloadable at http://www.eiga.eu..

DISCLAIMER OF LIABILITY
Before using this product in any new process or experiment, a thorough material compatibility and safety study should be carried out. Details given in this document are believed to be correct at the time of going to press. Whilst proper care has been taken in the preparation of this document, no liability for injury or damage resulting from its use can be accepted.
