SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier
   Trade name: Aligal 2, Lasal 2
   SDS no: AL062
   Chemical description: Carbon dioxide
   CAS-No.: 124-38-9
   EC-No.: 204-696-9
   EC Index-No.: ---

1.2. Relevant identified uses of the substance or mixture and uses advised against
   Relevant identified uses: Extinguishing agent
   Industrial and professional uses. Perform risk assessment prior to use.
   Test gas/Calibration gas.
   Purge gas, diluting gas, inerting gas.
   Shield gas for welding processes.
   Use for manufacture of electronic/photovoltaic components.
   Food applications.
   Consumer use.
   Use as a biocide.

1.3. Details of the supplier of the safety data sheet
   Company identification: Air Liquide Australia Limited
   Level 12 / 600 St. Kilda Road
   3004 Melbourne VIC Australia
   +61 3 9697 9888
   ALAEenquiries@AirLiquide.com

1.4. Emergency telephone number
   Emergency telephone number: 1800 812 588

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture
   Classification according to WHS Regulation
   Physical hazards: Gases under pressure - Liquefied gas
   Classification: H280

2.2. Label elements
   Classification according to WHS Regulation
Hazard pictograms : 

Signal word : Warning
Hazard statements : H280 - Contains gas under pressure; may explode if heated.
Precautionary statements
- Storage : P410+P403 - Protect from sunlight. Store in a well-ventilated place.

2.3. Other hazards :
Asphyxiant in high concentrations.
Contact with liquid may cause cold burns/frostbite.
In high concentrations CO2 causes rapid circulatory insufficiency even at normal levels of oxygen concentration. Symptoms are headache, nausea and vomiting, which may lead to unconsciousness and death.
The substance/mixture has no endocrine disrupting properties.

SECTION 3: Composition/information on ingredients

3.1. Substances

Full text of H- and EUH-statements: see section 16
Contains no other components or impurities which will influence the classification of the product.
*1: Listed in Annex IV / V REACH, exempted from registration.
*2: Registration deadline not expired.
*3: Registration not required: Substance manufactured or imported < 1t/y.

SECTION 4: First aid measures

4.1. Description of first aid measures
- Inhalation : Remove victim to uncontaminated area wearing self contained breathing apparatus. Keep victim warm and rested. Call a doctor. Perform cardiopulmonary resuscitation if breathing stopped.
- Skin contact : In case of frostbite spray with water for at least 15 minutes. Apply a sterile dressing. Obtain medical assistance.
- Eye contact : Immediately flush eyes thoroughly with water for at least 15 minutes.
- Ingestion : Ingestion is not considered a potential route of exposure.

4.2. Most important symptoms and effects, both acute and delayed
In high concentrations may cause asphyxiation. Symptoms may include loss of mobility/consciousness. Victim may not be aware of asphyxiation.
Low concentrations of CO2 cause increased respiration and headache.
See section 11.

4.3. Indication of any immediate medical attention and special treatment needed
None.

SECTION 5: Firefighting measures
CARBON DIOXIDE, Compressed & Liquefied Gas

Reference number: AL062

5.1. Extinguishing media

- Suitable extinguishing media : Water spray or fog.
  Product does not burn, use fire control measures appropriate for the surrounding fire.

- Unsuitable extinguishing media : Do not use water jet to extinguish.

5.2. Special hazards arising from the substance or mixture

Specific hazards : Exposure to fire may cause containers to rupture/explode.

Hazardous combustion products : None.

5.3. Advice for fire-fighters

Specific methods : Use fire control measures appropriate for the surrounding fire. Exposure to fire and heat radiation may cause gas receptacles to rupture. Cool endangered receptacles with water spray jet from a protected position. Prevent water used in emergency cases from entering sewers and drainage systems. If possible, stop flow of product. Use water spray or fog to knock down fire fumes if possible. Move containers away from the fire area if this can be done without risk.

Special protective equipment for fire fighters : In confined space use self-contained breathing apparatus.
  Standard protective clothing and equipment (Self Contained Breathing Apparatus) for fire fighters.
  Standard EN 137 - Self-contained open-circuit compressed air breathing apparatus with full face mask.
  Standard EN 469 - Protective clothing for firefighters.
  Standard - EN 659: Protective gloves for firefighters.

Hazchem Code : 2T

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

No additional information available

6.2. Environmental precautions

: Try to stop release.

6.3. Methods and material for containment and cleaning up

: Ventilate area.

6.4. Reference to other sections

: See also sections 8 and 13.

SECTION 7: Handling and storage

7.1. Precautions for safe handling

Safe use of the product : The product must be handled in accordance with good industrial hygiene and safety procedures.
  Only experienced and properly instructed persons should handle gases under pressure.
  Consider pressure relief device(s) in gas installations.
  Ensure the complete gas system was (or is regularly) checked for leaks before use.
  Do not smoke while handling product.
  Use only properly specified equipment which is suitable for this product, its supply pressure and temperature. Contact your gas supplier if in doubt.
  Avoid suck back of water, acid and alkalis.
  Do not breathe gas.
  Avoid release of product into atmosphere.
  Containers, which contain or have contained flammable or explosive substances, must not be inerted with liquid carbon dioxide. Potential production of solid CO2 particles must be ruled out.
  In order to rule out potential electrostatic discharge production, the system must be adequately grounded.
  Be aware of the risk of formation of static electricity with the use of CO2 extinguishers. Do not use them in places where a flammable atmosphere may be present.
CARBON DIOXIDE, Compressed & Liquefied Gas

Reference number: AL062

Safe handling of the gas receptacle:

Refer to supplier's container handling instructions. Do not allow backfeed into the container. Protect containers from physical damage; do not drag, roll, slide or drop. When moving cylinders, even for short distances, use a cart (trolley, hand truck, etc.) designed to transport cylinders. Leave valve protection caps in place until the container has been secured against either a wall or bench or placed in a container stand and is ready for use. If user experiences any difficulty operating valve discontinue use and contact supplier. Never attempt to repair or modify container valves or safety relief devices. Damaged valves should be reported immediately to the supplier. Keep container valve outlets clean and free from contaminants particularly oil and water. Replace valve outlet caps or plugs and container caps where supplied as soon as container is disconnected from equipment. Close container valve after each use and when empty, even if still connected to equipment. Never attempt to transfer gases from one cylinder/container to another. Never use direct flame or electrical heating devices to raise the pressure of a container. Do not remove or deface labels provided by the supplier for the identification of the content of the container. Suck back of water into the container must be prevented. Open valve slowly to avoid pressure shock.

7.2. Conditions for safe storage, including any incompatibilities

Observe all regulations and local requirements regarding storage of containers. Containers should not be stored in conditions likely to encourage corrosion. Container valve guards or caps should be in place. Containers should be stored in the vertical position and properly secured to prevent them from falling over. Stored containers should be periodically checked for general condition and leakage. Keep container below 50°C in a well ventilated place. Keep containers in location free from fire risk and away from sources of heat and ignition. Keep away from combustible materials.

7.3. Specific end use(s)

None.

SECTION 8: Exposure controls/personal protection

8.1. Control parameters

OEL (Occupational Exposure Limits): No data available.
DNEL (Derived-No Effect Level): No data available.
PNEC (Predicted No-Effect Concentration): No data available.

8.2. Exposure controls

8.2.1. Appropriate engineering controls:

Provide adequate general and local exhaust ventilation. Systems under pressure should be regularly checked for leakages. Ensure exposure is below occupational exposure limits (where available). Oxygen detectors should be used when asphyxiating gases may be released. Consider the use of a work permit system e.g. for maintenance activities.

8.2.2. Individual protection measures, e.g. personal protective equipment:

A risk assessment should be conducted and documented in each work area to assess the risks related to the use of the product and to select the PPE that matches the relevant risk. The following recommendations should be considered: PPE compliant to the recommended EN/ISO standards should be selected.

• Eye/face protection:

   Wear goggles when transfilling or breaking transfer connections.
   Standard EN 166 - Personal eye-protection - specifications

• Skin protection
  - Hand protection:

   Wear working gloves when handling gas containers.
   Standard EN 388 - Protective gloves against mechanical risk.
   Wear cold insulating gloves when transfilling or breaking transfer connections.
   Standard EN 511 - Cold Insulating gloves.
CARBON DIOXIDE, Compressed & Liquefied Gas

- Other
  : Wear safety shoes while handling containers.
  Standard EN ISO 20345 - Personal protective equipment - Safety footwear.

  • Respiratory protection
  : Standard EN 137 - Self-contained open-circuit compressed air breathing apparatus with full face mask.
  Self contained breathing apparatus (SCBA) or positive pressure airline with mask are to be used in oxygen-deficient atmospheres.
  Self contained breathing apparatus is recommended, where unknown exposure may be expected, e.g. during maintenance activities on installation systems.

  • Thermal hazards
  : None in addition to the above sections

8.2.3. Environmental exposure controls
  : None necessary.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

  Appearance
  - Physical state at 20°C / 101.3kPa : Gas.
  - Colour : Colourless.

  Odour : Odourless.
  Odour threshold : Odour threshold is subjective and inadequate to warn of overexposure.

  pH value : Not applicable for gases and gas mixtures.

  Molar mass : 44 g/mol
  Melting point : -78.5 °C At atmospheric pressure dry ice sublimes into gaseous carbon dioxide.

  Boiling point : -56.6 °C
  Flash point : Not applicable.

  Critical temperature [°C] : 30 °C
  Evaporation rate (ether=1) : No data available
  Flammability range : Non flammable.

  Vapour pressure [20°C] : 57.3 bar(a)
  Vapour pressure [50°C] : Not applicable.

  Relative density, gas (air=1) : 1.52
  Relative density, liquid (water=1) : 0.82

  Solubility in water : 2000 mg/l
  Partition coefficient n-octanol/water [log Kow] : 0.83

  Auto-ignition temperature : Non flammable.
  Decomposition point [°C] : Not applicable.

  Viscosity [20°C] : No reliable data available.
  Explosive Properties : No data available
  Oxidising Properties : No oxidising properties

9.2. Other information

  Other data
  : Gas/vapour heavier than air. May accumulate in confined spaces, particularly at or below ground level.

SECTION 10: Stability and reactivity

10.1. Reactivity

  : No reactivity hazard other than the effects described in sub-sections below.

10.2. Chemical stability

  : Stable under normal conditions.
SECTION 11: Toxicological information

11.1. Information on toxicological effects

Acute toxicity: Toxicological effects not expected from this product if occupational exposure limit values are not exceeded.

Skin corrosion/irritation: No known effects from this product.

Serious eye damage/irritation: No known effects from this product.

Respiratory or skin sensitisation: No known effects from this product.

Germ cell mutagenicity: No known effects from this product.

Carcinogenicity: No known effects from this product.

Toxic for reproduction: Fertility: No known effects from this product.

Toxic for reproduction: unborn child: No known effects from this product.

STOT-single exposure: No known effects from this product.

STOT-repeated exposure: No known effects from this product.

Aspiration hazard: Not applicable for gases and gas mixtures.

Other information: Unlike simple asphyxiants, carbon dioxide has the ability to cause death even when normal oxygen levels (20-21%) are maintained. 5% CO2 has been found to act synergistically to increase the toxicity of certain other gases (CO, NO2). CO2 has been shown to enhance the production of carboxy- or met-hemoglobin by these gases possibly due to carbon dioxide’s stimulatory effects on the respiratory and circulatory systems. For more information, see 'EIGA Safety Info 24: Carbon Dioxide, Physiological Hazards' at www.eiga.eu. The substance/mixture has no endocrine disrupting properties.

SECTION 12: Ecological information

12.1. Toxicity

Assessment: No ecological damage caused by this product.

12.2. Persistence and degradability

Assessment: No ecological damage caused by this product.

12.3. Bioaccumulative potential

Assessment: No ecological damage caused by this product. Not expected to bioaccumulate due to the low log Kow (log Kow < 4). See section 9.

12.4. Mobility in soil

Assessment: No ecological damage caused by this product.

12.5. Results of PBT and vPvB assessment

Assessment: Not classified as PBT or vPvB.

12.6. Other adverse effects

Assessment: No known effects from this product.
Effect on the ozone layer : No effect on the ozone layer.
Global warming potential [CO2=1] : 1
Effect on global warming : When discharged in large quantities may contribute to the greenhouse effect.
Contains greenhouse gas(es).

SECTION 13: Disposal considerations

13.1. Waste treatment methods
May be vented to atmosphere in a well ventilated place.
Do not discharge into any place where its accumulation could be dangerous.
Return unused product in original container to supplier.
List of hazardous waste codes (from Commission Decision 2000/532/EC as amended) : 16 05 05 : Gases in pressure containers other than those mentioned in 16 05 04.

13.2. Additional information
None.
External treatment and disposal of waste should comply with applicable local and/or national regulations

SECTION 14: Transport information

14.1. UN number
UN-No. : 1013

14.2. UN proper shipping name
Transport by road/rail (ADG) : CARBON DIOXIDE
Transport by air (ICAO-TI / IATA-DGR) : Carbon dioxide
Transport by sea (IMDG) : CARBON DIOXIDE

14.3. Transport hazard class(es)
Labelling
2.2 : Non-flammable, non-toxic gases

Transport by road/rail (ADG)
Class : 2
Hazchem Code : 2T
Hazard identification number : 20
Tunnel Restriction : C/E - Tank carriage : Passage forbidden through tunnels of category C, D and E. Other carriage : Passage forbidden through tunnels of category E

Transport by air (ICAO-TI / IATA-DGR)
Class / Div. (Sub. risk(s)) : 2.2

Transport by sea (IMDG)
Class / Div. (Sub. risk(s)) : 2.2
Emergency Schedule (EmS) - Fire : F-C
Emergency Schedule (EmS) - Spillage : S-V

14.4. Packing group
Transport by road/rail (ADR/RID) : Not applicable
Transport by air (ICAO-TI / IATA-DGR) : Not applicable
Transport by sea (IMDG) : Not applicable

### 14.5. Environmental hazards

Transport by road/rail (ADR/RID) : None.
Transport by air (ICAO-TI / IATA-DGR) : None.
Transport by sea (IMDG) : None.

#### 14.6. Special precautions for user

**No additional information available**

**Packing Instruction(s)**

- Transport by road/rail (ADR/RID) : P200
- Transport by air (ICAO-TI / IATA-DGR)
  - Passenger and Cargo Aircraft : 200
  - Cargo Aircraft only : 200
- Transport by sea (IMDG) : P200

**Special transport precautions**

- Avoid transport on vehicles where the load space is not separated from the driver's compartment.
- Ensure vehicle driver is aware of the potential hazards of the load and knows what to do in the event of an accident or an emergency.
- Before transporting product containers:
  - Ensure there is adequate ventilation.
  - Ensure that containers are firmly secured.
  - Ensure valve is closed and not leaking.
  - Ensure valve outlet cap nut or plug (where provided) is correctly fitted.
  - Ensure valve protection device (where provided) is correctly fitted.

**HAZCHEM CODE**

: 2T

#### 14.7. Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code

: Not applicable.

### SECTION 15: Regulatory information

#### 15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

**National regulations**

Ensure all national/local regulations are observed.

**15.2. Chemical safety assessment**

: A CSA does not need to be carried out for this product.

### SECTION 16: Other information

**Indication of changes**

CARBON DIOXIDE, Compressed & Liquefied Gas

Abbreviations and acronyms:

Training advice:
The hazard of asphyxiation is often overlooked and must be stressed during operator training. For more guidance, refer to EIGA SL 01 "Dangers of Asphyxiation", downloadable at http://www.eiga.eu..

DISCLAIMER OF LIABILITY:
Before using this product in any new process or experiment, a thorough material compatibility and safety study should be carried out. Details given in this document are believed to be correct at the time of going to press. Whilst proper care has been taken in the preparation of this document, no liability for injury or damage resulting from its use can be accepted.
