SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier
Trade name : Medical Oxygen, EP Grade
SDS no : ALH605
Chemical description : Oxygen
   CAS-No. : 7782-44-7
Chemical formula : O₂

1.2. Relevant identified uses of the substance or mixture and uses advised against
Relevant identified uses : Medical: Treat and prevent hypoxemia.
Uses advised against : Uses other than those listed above are not supported, contact your supplier for more information on other uses.

1.3. Details of the supplier of the safety data sheet
Company identification : Air Liquide Healthcare Pty Limited
   Level 4, Suite 4
   247 Coward Street
   Mascot NSW 2020 Australia
   1300 36 02 02
   ALHEnquiries@AirLiquide.com

1.4. Emergency telephone number
Emergency telephone number : 1800 812 588

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture
Classification according to WHS Regulation
   Physical hazards Oxidising Gases, Category 1 H270
   Gases under pressure : Compressed gas H280

2.2. Label elements
Classification according to WHS Regulation
   Hazard pictograms :
   Signal word : Danger
**Hazard statements**

H270 - May cause or intensify fire; oxidiser.

H280 - Contains gas under pressure; may explode if heated.

**Precautionary statements**

- **Prevention**:
  - P220 - Keep away from combustible materials.
  - P244 - Keep valves and fittings free from oil and grease.

- **Response**:
  - P370+P376 - In case of fire: Stop leak if safe to do so.

- **Storage**:
  - P403 - Store in a well-ventilated place.

**2.3 Other hazards**

- Not classified as PBT or vPvB.
The substance/mixture has no endocrine disrupting properties.

### SECTION 3: Composition/information on ingredients

#### 3.1 Substances

<table>
<thead>
<tr>
<th>Name</th>
<th>Product identifier</th>
<th>%</th>
<th>Classification according to WHS Regulation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Oxygen</td>
<td>(CAS-No.) 7782-44-7 (EC-No.) 231-956-9 (EC Index-No.) 006-001-00-8 (REACH registration No) *1</td>
<td>100</td>
<td>Ox. Gas 1, H270 Press. Gas (Comp.), H280</td>
</tr>
</tbody>
</table>

Contains no other components or impurities which will influence the classification of the product.

*1: Listed in Annex IV / V REACH, exempted from registration.

*2: Registration deadline not expired.

*3: Registration not required: Substance manufactured or imported < 1t/y.

Full text of R-phrases see section 16. Full text of H-statements see section 16.

### SECTION 4: First aid measures

#### 4.1 Description of first aid measures

- **Inhalation**
  - Adverse effects not expected from this product.
  - Remove victim to uncontaminated area wearing self contained breathing apparatus. Keep victim warm and rested. Call a doctor. Perform cardiopulmonary resuscitation if breathing stopped.

- **Skin contact**
  - Adverse effects not expected from this product.

- **Eye contact**
  - Adverse effects not expected from this product.

- **Ingestion**
  - Ingestion is not considered a potential route of exposure.

#### 4.2 Most important symptoms and effects, both acute and delayed

- See section 11.

#### 4.3 Indication of any immediate medical attention and special treatment needed

- None.

### SECTION 5: Firefighting measures

#### 5.1 Extinguishing media

- **Suitable extinguishing media**
  - Water spray or fog.
  - Product does not burn, use fire control measures appropriate for the surrounding fire.

- **Unsuitable extinguishing media**
  - Do not use water jet to extinguish.

#### 5.2 Special hazards arising from the substance or mixture

- Specific hazards
  - Exposure to fire may cause containers to rupture/explode.
  - Supports combustion.
5.3 Advice for fire-fighters

Specific methods
- Use fire control measures appropriate for the surrounding fire. Exposure to fire and heat radiation may cause gas receptacles to rupture. Cool endangered receptacles with water spray jet from a protected position. Prevent water used in emergency cases from entering sewers and drainage systems.
- If possible, stop flow of product.
- Use water spray or fog to knock down fire fumes if possible.
- Move containers away from the fire area if this can be done without risk.

Special protective equipment for fire fighters
- Standard protective clothing and equipment (Self Contained Breathing Apparatus) for fire fighters.
- Standard EN 137 - Self-contained open-circuit compressed air breathing apparatus with full face mask.
- Standard EN 469 - Protective clothing for firefighters.
- Standard - EN 659: Protective gloves for firefighters.

SECTION 6: Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures

No additional information available

6.2 Environmental precautions

- Try to stop release.

6.3 Methods and material for containment and cleaning up

- Ventilate area.

6.4 Reference to other sections

- See also sections 8 and 13.

SECTION 7: Handling and storage

7.1 Precautions for safe handling

Safe use of the product
- The product must be handled in accordance with good industrial hygiene and safety procedures.
- Only experienced and properly instructed persons should handle gases under pressure.
- Consider pressure relief device(s) in gas installations.
- Ensure the complete gas system was (or is regularly) checked for leaks before use.
- Do not smoke while handling product.
- Keep equipment free from oil and grease. For more guidance, refer to the EIGA Doc. 33 - Cleaning of Equipment for Oxygen Service downloadable at http://www.eiga.eu.
- Use no oil or grease.
- Use only properly specified equipment which is suitable for this product, its supply pressure and temperature. Contact your gas supplier if in doubt.
- Use only oxygen approved lubricants and oxygen approved sealings.
- Use only with equipment cleaned for oxygen service and rated for cylinder pressure.
- Avoid suck back of water, acid and alkalis.
- Do not breathe gas.
Safe handling of the gas cylinder: Refer to supplier's cylinder handling instructions.
Do not allow backfeed into the cylinder.
Protect cylinders from physical damage; do not drag, roll, slide or drop.
When moving cylinders, even for short distances, use a cart (trolley, hand truck, etc.) designed to transport cylinders.
Leave valve protection caps in place until the cylinder has been secured against either a wall or bench or placed in a container stand and is ready for use.
If user experiences any difficulty operating valve discontinue use and contact supplier.
Never attempt to repair or modify cylinder valves or safety relief devices.
Damaged valves should be reported immediately to the supplier.
Keep cylinder valve outlets clean and free from contaminants particularly oil and water.
Replace valve outlet caps or plugs and cylinder caps where supplied as soon as cylinder is disconnected from equipment.
Close cylinder valve after each use and when empty, even if still connected to equipment.
Never attempt to transfer gases from one cylinder to another.
Do not remove or deface labels provided by the supplier for the identification of the content of the cylinder.
Suck back of water into the cylinder must be prevented.
Open valve slowly to avoid pressure shock.

7.2. Conditions for safe storage, including any incompatibilities

: Observe all regulations and local requirements regarding storage of cylinders.
Cylinders should not be stored in conditions likely to encourage corrosion.
Cylinder valve guards or caps should be in place.
Cylinders should be stored in the vertical position and properly secured to prevent them from falling over.
Stored cylinders should be periodically checked for general condition and leakage.
Keep cylinder below 50°C in a well ventilated place.
Segregate from flammable gases and other flammable materials in store.
Store cylinders in location free from fire risk and away from sources of heat and ignition.
Keep away from combustible materials.

7.3. Specific end use(s)

: None.

SECTION 8: Exposure controls/personal protection

8.1. Control parameters

OEL (Occupational Exposure Limits): No data available.
DNEL (Derived-No Effect Level): No data available.
PNEC (Predicted No-Effect Concentration): No data available.

8.2. Exposure controls

8.2.1. Appropriate engineering controls

: Provide adequate general and local exhaust ventilation.
Systems under pressure should be regularly checked for leakages.
Gas detectors should be used when oxidising gases may be released.
Consider the use of a work permit system e.g. for maintenance activities.

8.2.2. Individual protection measures, e.g. personal protective equipment

: A risk assessment should be conducted and documented in each work area to assess the risks related to the use of the product and to select the PPE that matches the relevant risk. The following recommendations should be considered:
PPE compliant to the recommended Australian or EN/ISO standards should be selected.

• Eye/face protection

: Wear safety glasses with side shields.
Standard EN 166 - Personal eye-protection; AS/NZS 1337.1 – Eye and face protectors for occupational applications.

• Skin protection
**Hand protection**: Wear working gloves when handling gas cylinders.
  - Standard EN 388 - Protective gloves against mechanical risk, performance level 1 or higher.
  - AS/NZS 2161.3 – Occupational protective gloves, protection against mechanical risks.
- **Other**: Consider the use of flame resistant safety clothing.
  - Wear safety shoes while handling cylinders.
  - Standard EN ISO 20345 - Personal protective equipment - Safety footwear. AS/NZS 2210.3 – Occupational protective footwear, specifications for safety footwear.
- **Respiratory protection**: Standard EN 137 - Self-contained open-circuit compressed air breathing apparatus with full face mask. Self contained breathing apparatus is recommended, where unknown exposure may be expected, e.g. during maintenance activities on installation systems. None necessary.

- **Thermal hazards**: None in addition to the above sections.

### 8.2.3. Environmental exposure controls

Refer to local regulations for restriction of emissions to the atmosphere. See section 13 for specific methods for waste gas treatment.

### SECTION 9: Physical and chemical properties

#### 9.1. Information on basic physical and chemical properties

**Appearance**
- Physical state at 20°C / 101.3kPa: Gas.
- Colour: Colourless.

**Odour**
No odour warning properties.

**Odour threshold**
Odour threshold is subjective and inadequate to warn of overexposure.

**pH value**
Not applicable for gases and gas mixtures.

**Molar mass**
32 g/mol

**Melting point**
-219 °C

**Boiling point**
-183 °C

**Flash point**
Not applicable for gases and gas mixtures.

**Critical temperature [°C]**
-118 °C

**Evaporation rate (ether=1)**
No data available

**Flammability range**
Non flammable.

**Vapour pressure [20°C]**
Not applicable.

**Vapour pressure [50°C]**
Not applicable.

**Relative density, gas (air=1)**
1.1

**Relative density, liquid (water=1)**
1.1

**Solubility in water**
39 mg/l

**Partition coefficient n-octanol/water [log Kow]**
Not applicable for inorganic products.

**Auto-ignition temperature**
Non flammable.

**Decomposition point [°C]**
Not applicable.

**Viscosity [20°C]**
No reliable data available.

**Explosive Properties**
No data available

**Oxidising Properties**
Oxidiser.

- **Coefficient of oxygen equivalency (Ci)**
1

#### 9.2. Other information

Other data
No additional information available
SECTION 10: Stability and reactivity

10.1. Reactivity
: No reactivity hazard other than the effects described in sub-sections below.

10.2. Chemical stability
: Stable under normal conditions.

10.3. Possibility of hazardous reactions
: Violently oxidises organic material.

10.4. Conditions to avoid
: Avoid moisture in installation systems.

10.5. Incompatible materials
: Keep equipment free from oil and grease. For more guidance, refer to the EIGA Doc. 33 - Cleaning of Equipment for Oxygen Service downloadable at http://www.eiga.eu. Consider the potential toxicity hazard due to the presence of chlorinated or fluorinated polymers in high pressure (> 30 bar) oxygen lines in case of combustion. May react violently with combustible materials. May react violently with reducing agents. For additional information on compatibility refer to ISO 11114.

10.6. Hazardous decomposition products
: None.

SECTION 11: Toxicological information

11.1. Information on toxicological effects
Acute toxicity
: No toxicological effects from this product.
Skin corrosion/irritation
: No known effects from this product.
Serious eye damage/irritation
: No known effects from this product.
Respiratory or skin sensitisation
: No known effects from this product.
Germ cell mutagenicity
: No known effects from this product.
Carcinogenicity
: No known effects from this product.
Toxic for reproduction : Fertility
: No known effects from this product.
Toxic for reproduction : unborn child
: No known effects from this product.
STOT-single exposure
: No known effects from this product.
STOT-repeated exposure
: No known effects from this product.
Aspiration hazard
: Not applicable for gases and gas mixtures.
Other information
: The substance/mixture has no endocrine disrupting properties.

SECTION 12: Ecological information

12.1. Toxicity
Assessment
: No ecological damage caused by this product.

12.2. Persistence and degradability
Assessment
: No ecological damage caused by this product.

12.3. Bioaccumulative potential
Assessment : No ecological damage caused by this product.

12.4. Mobility in soil

Assessment : No ecological damage caused by this product.

12.5. Results of PBT and vPvB assessment

Assessment : Not classified as PBT or vPvB.

12.6. Other adverse effects

Effect on the ozone layer : No effect on the ozone layer.
Effect on global warming : None.

SECTION 13: Disposal considerations

13.1. Waste treatment methods

Contact supplier if guidance is required.
May be vented to atmosphere in a well ventilated place.
Do not discharge into any place where its accumulation could be dangerous.
Ensure that the emission levels from local regulations or operating permits are not exceeded.
Refer to the EIGA code of practice Doc.30 "Disposal of Gases", downloadable at http://www.eiga.org for more guidance on suitable disposal methods.
Return unused product in original cylinder to supplier.

13.2. Additional information

External treatment and disposal of waste should comply with applicable local and/or national regulations

SECTION 14: Transport information

14.1. UN number

UN-No. : 1072

14.2. UN proper shipping name

Transport by road/rail (ADG) : OXYGEN, COMPRESSED
Transport by air (ICAO-TI / IATA-DGR) : Oxygen, compressed
Transport by sea (IMDG) : OXYGEN, COMPRESSED

14.3. Transport hazard class(es)

Labelling : 

2.2 : Non-flammable, non-toxic gases
5.1 : Oxidizing substances

Transport by road/rail (ADG)
Class : 2
Hazchem Code : 2S
Hazard identification number : 25
Tunnel Restriction : E - Passage forbidden through tunnels of category E

Transport by air (ICAO-TI / IATA-DGR)
MEDICAL OXYGEN, COMPRESSED (O2)

Reference number: ALH605

Class / Div. (Sub. risk(s)) : 2.2 (5.1)

Transport by sea (IMDG)
Class / Div. (Sub. risk(s)) : 2.2 (5.1)
Emergency Schedule (EmS) - Fire : F-C
Emergency Schedule (EmS) - Spillage : S-W

14.4. Packing group

Transport by road/rail (ADR/RID) : Not applicable
Transport by air (ICAO-TI / IATA-DGR) : Not applicable
Transport by sea (IMDG) : Not applicable

14.5. Environmental hazards

Transport by road/rail (ADR/RID) : None.
Transport by air (ICAO-TI / IATA-DGR) : None.
Transport by sea (IMDG) : None.

14.6. Special precautions for user

No additional information available

Packing Instruction(s)
Transport by road/rail (ADR/RID) : P200
Transport by air (ICAO-TI / IATA-DGR)
Passenger and Cargo Aircraft : 200
Cargo Aircraft only : 200
Transport by sea (IMDG) : P200

Special transport precautions
Avoid transport on vehicles where the load space is not separated from the driver's compartment.
Ensure vehicle driver is aware of the potential hazards of the load and knows what to do in the event of an accident or an emergency.
Before transporting product containers:
- Ensure there is adequate ventilation.
- Ensure that containers are firmly secured.
- Ensure valve is closed and not leaking.
- Ensure valve outlet cap nut or plug (where provided) is correctly fitted.
- Ensure valve protection device (where provided) is correctly fitted.
Do not load or transport cylinders other than in accordance with load restraint guidelines and relevant road safety laws.

HAZCHEM CODE : 2S

14.7. Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code

: Not applicable.

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

National regulations
Therapeutic Goods Registered prescription medicine on the Australian Register of Therapeutic Goods (ARTG ID 32749)

15.2. Chemical safety assessment

A CSA does not need to be carried out for this product.
**SECTION 16: Other information**

**Indication of changes**: Revised safety data sheet in accordance with commission regulation (EU) No 453/2010 and relevant work, health and safety regulations.

**Training advice**: None. Ensure operators understand the hazard of oxygen enrichment.

**Full text of H-statements**

| H270   | May cause or intensify fire; oxidiser.       |
| H280   | Contains gas under pressure; may explode if heated. |
| Ox. Gas 1 | Oxidising Gases, Category 1    |
| Press. Gas (Comp.) | Gases under pressure: Compressed gas |

**DISCLAIMER OF LIABILITY**: Before using this product in any new process or experiment, a thorough material compatibility and safety study should be carried out.

Details given in this document are believed to be correct at the time of going to press.

Whilst proper care has been taken in the preparation of this document, no liability for injury or damage resulting from its use can be accepted.
